

## **Jack McAndrews's Eagle Project**

Jack McAndrews's eagle project consisted of restoring the historic carriage house in Fallsington. About a dozen helpers from the troop attended one Saturday at 10 o'clock in the morning to sand and paint the structure. Everyone also laid down gravel, cleaned away vegetation, and installed windows.

The weather was only slightly cool and quite beautiful overall as the colors of fall were beginning to vividly appear. Lunch was at 1 o'clock in the afternoon, and there were cookies

and pizza. After two hours of work, everyone began to leave little by little. The carriage house was wonderfully transformed due to the hard work of everyone involved, especially Jack from running the project. Great work!
